Introduction

William Duncan Strong (1899–1962) was a major figure in American anthropology. His accomplishments were as a field worker in archeology and ethnology, archeological theorist, writer, and teacher. He was, furthermore, a leader in anthropological organizations. In 1954, his position in the field was recognized by the award of the Viking Fund Medal for his contributions to archaeology.

The Strong papers were donated to the archives by Strong's widow, Mrs. Helen Richardson Strong. Most of the arrangements were handled by Ralph S. Solecki, then of Columbia University. He sent the papers to the archives between 1974 and 1979, and there have been small accretions since that time. Mrs. Strong donated the rights in the unpublished material in the collection to the public.

The collection occupies approximately thirty-one and a half shelf feet.

Scope and Content Note

William Duncan Strong's early interest was in zoology; but, while an undergraduate at the University of California, he was brought into anthropology under the influence of Alfred Louis Kroeber. He conducted archeological and ethnological field research in several areas of the New World, including Labrador, southern California, Honduras, and Peru. Strong was the first professionally trained archeologist to focus on the Great Plains, and it was there that he applied the so-called direct historical method, working from known history in interpreting archeological sites. His work in all these areas are represented by notebooks, diaries, specimen catalogues, maps, and photographs.

Strong spent the majority of his professional life affiliated with various universities and taught many anthropologists who became influential in their own right. His students included Loren Eiseley, Waldo R. Wedel, Joseph Jablow, Oscar Lewis, John Landgraf, Dorothy Keur, David Stout, Charles Wagley, Eleanor Leacock, John Champe, Albert C. Spaulding, Victor Barnouw, John M. Corbett, Walter Fairservis, and Richard B. Woodbury. Strong preserved the student papers by some of these anthropologists as well as their correspondence with him.

Strong influenced American anthropology by his service in professional societies. He served as president of the American Ethnological Society, the Institute of Andean Research, and the Society for American Archaeology. He was the director of the Ethnogeographic Board (his journal from his tenure as director is in the papers) and chairman of the Committee on Basic Needs of American Archaeology. In this latter capacity, Strong was involved in establishing a program to salvage archaeological sites before they were destroyed by public works. Strong served as the anthropological consultant to the Bureau of Indian Affairs during the Roosevelt administration and advised on new directions to be taken in Indian Service policy.

Strong's papers include correspondence, field notes, diaries, newspaper clippings, teaching notes and student papers, manuscripts of his writings, writings by other authors, papers from the various organizations in which he served, maps, and a considerable number of photographs from his field work. The materials date from 1902 to 1965, with most of the materials being from 1927 to 1955.

Strong's papers reflect his professional life, but there is little personal material. Except for the Rawson-MacMillan Labrador Expedition, there is little information from Strong's years at the Field Museum of Natural History in Chicago. Other than information on field work expenses, there is little light shed on Strong's personal financial situation. There is no personal correspondence with either of his wives and little correspondence with family members, except for his brother, Ronald. Some correspondence from the late 1930s to the early 1940s is not present and its whereabouts is not known. Of special interest is a collection of drawings by Naskapi Indian children collected while Strong was on the Labrador expedition. Obituaries, vitae, news articles, and writings on and by other anthropologists were collected by Strong. He was an inveterate doodler, and his fascinating creations appear throughout the papers.

Strong collected materials from other researchers, including Loren Eiseley's 1931 field notes from the Morrill Expedition, Maurice Kirby's 1932 notes on the Signal Butte excavations, notes and drawings from the 1936 Honduras expedition by Alfred V. Kidder II, and the field notebooks kept by Clifford Evans for the 1946 Virú Valley expedition in Peru. Contributed photographs from field expeditions are from A.T. Hill, Waldo Wedel, and John Champe.

Additional materials in the National Anthropological Archives relating to William Duncan Strong can be found in the records of the American Anthropological Association, Bureau of American Ethnology, Handbook of South American Indians, Institute of Social Anthropology, River Basin Surveys, the Society for American Archaeology, and Tulamni Project (1933–1934); the papers of Ralph Leon Beals, John Peabody Harrington, Frederick Johnson, Frank Maryl Setzler, Ruth Schlossberg Landes, Albert Clanton Spaulding (including information on the Arzberger site), and Waldo Rudolph and Mildred Mott Wedel; Photographic Lot 14, Bureau of American Ethnology Subject and Geographic File; Photographic Lot 24, Bureau of American Ethnology-United States National Museum Photographs of American Indians; Photographic Lot 77-80, Portraits of Smithsonian Anthropologists; Photographic Lot 92-35, Ralph S. Solecki Photographs of Anthropologists; Numbered Collections, MS 4821 (records of the Anthropological Society of Washington), MS 4261 (photographs made on a site survey in the Santa Barbara Mountains, California, 1934), MS 4302 (journal covering the 1936 expedition to Honduras), MS 4846 (correspondence between BAE authors and the BAE editor's office), and MS 7200 (original field catalog of Honduran artifacts, 1936); and in the non-archival reference file. There are also materials in the Smithsonian Institution Archives in record units 87 (Ethnogeographic Board), 9528 (Henry Bascom Collins interviews), and 1050102 (papers of T. Wayland Vaughan). In the Human Studies Film Archives there is material on Strong in the video dialogues of Charles Wagley, 1983.

Series Descriptions and Container Lists

MISCELLANEOUS PERSONAL PAPERS. 1914–1963. 10 inches.

Arranged alphabetically.

Mostly, the documents consist of various personal papers on or by William Duncan Strong. Strong's early interest in zoology is evident in the drawings of birds and animals made before he matriculated at the University of California. The Society for American Archaeology selected Strong as the recipient of the Viking Fund Medal in 1954 for his contributions to archeology. The Viking Fund Medal was made possible by the Viking Fund (later the Wenner-Gren Foundation for Anthropological Research, Inc.) and was first awarded in 1946. The series includes portraits of Strong and his second wife, Helen Richardson Strong. Some of the materials were donated by Ralph S. Solecki for the collection.

Box 1

Announcement of Strong's public examination for his Doctor of Philosophy degree, 1926

Bibliographies, ca. 1944–1955

Biographical material, 1963

(From R.S. Solecki.)

Bird and animal sketches, 1915–1917

Viking Fund Medal, 1954

(Includes press releases and a portrait of Strong. The medal itself is not in
the collection. See the series of correspondence, subseries miscellaneous
correspondence, for additional information.)

Vitae, ca. 1934–ca. 1955

CORRESPONDENCE. 1922–1965. 5 feet.

The letters are filed by correspondent, organization, or subject.

The correspondence was originally arranged by the organization in which Strong was employed when he received or sent the letter. This method was not maintained. Instead, the papers were merged and arranged following an alphabetical arrangement. The subseries of personal and miscellaneous correspondence are letters which Strong maintained separately from the other correspondence. The labels on the miscellaneous folders are those used by Strong.

The series includes correspondence from various organizations, concerning some of which there are papers in the series relating to organizations. In addition to correspondence with various individuals, information relating to Strong's field work is under accounts, Bureau of Standards, expenses, Labrador, Rawson-MacMillan expedition, and miscellaneous correspondence.

Unidentified correspondents were placed at the front of the file.

Virú Valley Project, 1948–1953

MATERIALS RELATING TO FIELD WORK. 1921–1963. 4.6 feet.

Arranged chronologically by expedition.

The series includes diaries, journals, field and photograph catalogues, expenses, maps, manuscripts, ethnological notes, correspondence, and specialist's reports identifying faunal and vegetal remains.

While enrolled at the University of California, Strong participated in several expeditions. He worked in the southern San Joaquin Valley in California under the direction of Edwin W. Gifford, in the middle Columbia River Valley in Oregon and Washington, and with

W. Egbert Schenk in Baja California to collect faunal specimens. Records from Strong's 1924 and 1925 ethnological study of the Serrano, Cahuilla, Cupeño, and Luiseño of Riverside and San Diego counties in California are not in the collection and their whereabouts are unknown. Also, Strong's work on Max Uhle's Peruvian archeological collection is not in the collection.

Strong returned to California in 1933 and 1934 for two Civil Works Administration expeditions. Accompanied by Winslow M. Walker and Waldo R. Wedel, he surveyed the southern San Joaquin valley in California, excavating at Tulamni, a Yokuts village site, and the eastern Chumash area.

From 1927 to 1928, Strong, then at the Field Museum of Natural History in Chicago, served on the Rawson-MacMillan subarctic expedition. In this position, he did ethnological, archeological, and physical anthropological research on the native peoples of Labrador and Baffin Island.

As director of the University of Nebraska Archaeological Survey, Strong began the work in the Great Plains of the United States for which he would become widely known. His first field work in the region was to the Rock Bluff cemetery in 1930, and Strong followed this with the 1931 Morrill expedition in which he carried out archeological surveys in central and western Nebraska and South Dakota. Strong excavated at Signal Butte in Nebraska in 1931 and 1932, and he re-visited the Signal Butte site in 1950. Strong maintained the 1950 findings and correspondence with the Signal Butte materials from the earlier expeditions. In 1931 and 1932, Strong took the opportunity to carry out ethnological studies on the Arikara Indians at Nishu, North Dakota. He excavated at the Leavenworth (Lewis and Clark) and Rygh sites in South Dakota in 1932. Strong did not return to the Great Plains until 1938 when he excavated at the Fort Abraham Lincoln (Slant Village), Sheyenne, and other sites in North Dakota. The following year he excavated the Arzberger and Buffalo Pasture sites in South Dakota.

Strong revived his interest in Latin America with a 1933 expedition to northeastern Honduras, especially concentrating along the Patuca River. Accompanied by Allan W. Payne and Norman A. Haskell, Strong also surveyed the Bay Islands and did ethnological research on the Sumu Indians (the latter is not represented in the papers). An interesting article in the news clippings in the series of miscellany mentions how Strong avoided being recalled during a period of government cutbacks because no one knew where he was in Honduras. Strong, joined by Alfred V. Kidder II and Drexel A. Paul, Jr., returned to northwestern Honduras in 1936 on a joint Smithsonian-Harvard University expedition. This expedition surveyed sites in the Chamelicon Valley and at Naco.

In 1940, Strong went to western Florida and the southwestern United States and began his work on Peruvian archeology with an extensive survey of archeological sites. Under the auspices of the Institute of Andean Research, he returned to Peru from 1941 to 1942, excavating at Pachacamac in the Chancay Valley and at Ancon. With Gordon R. Willey and John M. Corbett, Strong wrote *Archeological Studies in Peru, 1941–1942* (1943), which was based on this work.

The Institute of Andean Research sponsored the Virú Valley Project in an attempt to study the problem of human cultural adaptation within a small area over a long period of time. As part of this extensive project, Strong and Clifford Evans, Jr., excavated in the Virú Valley of north coastal Peru in 1946. Strong and Evans wrote about their experiences in *Cultural Stratigraphy in the Virú Valley, Northern Peru* (1952). Strong's final Peruvian work was carried out in 1952 and 1953 in the Nazca and Ica Valleys.

Other information concerning Strong's field expeditions can be found in the series of correspondence, the news clippings in the miscellany, manuscripts of writings, writings by other authors, miscellaneous research notes, maps and charts, and photographs.

Descriptions in quotation marks are Strong's own.

Box 17

1921–1922, field notebook

(Includes expenses, a bibliography, vocabulary notes, and a department diary for June and July, 1929.)

1923–1924, San Joaquin Valley, southern California, field notebook

(Includes a diary from December 20–28, 1923 and one page of notes from the Burkett site, Nebraska, in 1931.)

1924

Columbia River expedition in Oregon and Washington, field notes
(Includes notes from Sauvies Island and Ramsey Point and a map of Sauvies Island.)

Spedis, Washington, field notes (Includes township maps of the Spedis area and hand-drawn maps of the Spedis Valley and site [includes soil profiles of features].)

1924–1925, Albany, Oregon, field notes

(Includes a map showing sites.)

1925, San Pedro Martir, Baja, California, field notebook

(The notes, dating from May 18 to June 16, include a list of faunal specimens.)

1927–1928, Rawson-MacMillan expedition

Field notebooks

Notebook 2, 1927–1928 (Includes a specimen catalogue and field notes from 1933–1934 Tulamniu excavations, with photographs of baskets and a textile[?] sample.)

Notebook II, 1927–1928 (Includes lists of skeletal material, an index to both volumes of field notebooks and the three diaries for this expedition, and a photocopy of the notebook. Beginning on page 25, this notebook continues the notes from notebook 3 for 1928.)

Notebook 3, volume I, 1928 (Includes notes on language, various ethnographic data, and a partial typescript of the notebook.)

Diaries, Rawson-MacMillan expedition

1927, volume I (Entries are from June 25 to September 27. Includes a list of the crew, site drawings, and news clippings concerning the trip.)

Box 18

1927–1928, volume II (Entries are from September 28, 1927, to February 12, 1928. Includes a Naskapi census by Richard White[?] on pages 154–157 and a typed copy of the diary from January 17 to February 12, 1928.)

1928

Volume III (Entries are from February 13 to July 23. Includes a typed copy of the pages from February 13 to April 3.)

Volume IV (Entries are from July 24 to September 8. Includes site drawings.)

Bone artifacts

(Index cards with descriptions of bone artifacts and, verso, drawings of artifacts. It is not firmly established that these go with this expedition. The writing is not in Strong's hand, but the description indicates the materials were recovered from the Arctic.)

Maps

(Hand-drawn maps showing sites and other places of interest. In the map drawer is an Indian sketch map of northeastern Labrador [1928], Joe Richie's third map, untitled map with a genealogy on the verso, map of eastern Labrador [1906], and map of the North Atlantic Ocean, Northwest sheet [1922].)

"Census of the Davis Inlet and Barren Ground bands in 1928(?)," 1928 (Lists the people in each band. Includes typescripts from an unidentified manuscript. Two genealogical tables are in the map drawer.)

Hunts River supply list (Includes names of the participants on the expedition.)

Miscellany (Includes excerpts from writings on Labrador dating from 999 A.D.)

1930, Rock Bluff cemetery site, field notebook

(Includes drawings of features and excavations.)

1931

Burkett site, Nebraska, field notes (See the field notebook for the 1923–1924 trip to San Joaquin Valley.)

Central and western Nebraska, and South and North Dakota, field notes (Includes notes from the Robinson site in Custer County.)

Loren Eiseley's field notes, Morrill expedition

Box 19

1931–1932, Nebraska-South Dakota expedition, field notebook

(Includes descriptions of various sites, a time-line of Nebraska cultures, notes on Signal Butte, notes on the Vermillion Conference in 1931, and ethnological notes on Arikara with a list of informants and interpreters.)

1931–1963, Signal Butte, Nebraska

Field notebooks

1932 and 1950, original notes of Maurice Kirby on features and topography at Signal Butte (Includes a list of the crew, a few pages of a diary, and several pages of notes from the trip to Signal Butte in 1950.)

1932 (Includes notes on Leavenworth, Rygh, and other sites. Also includes notes from the 1931 archeological conference at Lincoln, Nebraska.)

Correspondence

1931–1941 (Includes reports on faunal material filed under Gerrit S. Miller's name and a facial reconstruction of a skull found at Scottsbluff, Nebraska, filed under MacNeil. At the back of the folder is a topographic map of Scotts Bluff, Nebraska, and notes written by Strong on recovered artifacts from Signal Butte. Correspondents include Earl H. Bell, Neil M. Judd, Maurice [Bud] Kirby, W. Van Royen, Waldo Wedel, and Clark Wissler.)

1948–1961 (Correspondents include John L. Champe, Richard Forbis, Maurice Kirby, and Timothy O'Leary. This material was maintained in a separate folder by Strong.)

1950–1963, C-14 dates and Lamont correspondence (Correspondents include John L. Champe, Richard Forbis, and the Lamont Geological Observatory.)

1932

Leavenworth and other sites

Notes (Typescripts are included with the 1957 letter of Strong to Waldo R. Wedel. See the folder on miscellany at the end of this series for notes on the Mandan that may be from this expedition.)

Specialists reports (Reports on vegetal material and artifacts, including beads.)

Rygh site, list of artifacts

Box 20

1933, Honduras

Field notebooks

1933 (Notes are from January 25 to July 17. Includes drawings of sites, artifacts, and fauna.)

1933 and 1936 (Pages 11–34 are from 1933 and include drawings of artifacts. Page 35 is from the 1936 expedition to Honduras.)

Correspondence and miscellaneous, 1936 (Letters are from Norman A. Haskell about the 1933 expedition. Includes a sketch map of the expedition by Strong.)

Site drawings and sketches by Ernicke (In boxes for oversized material.)

1933–1934, Tulamni

(Includes a map of site 2. Field notes are in notebook 2 for the 1927–1928 Rawson-MacMillan expedition.)

1936, Honduras

Field notebooks

Volume I (Entries are from January 5 to March 21. Includes drawings of artifacts and a table of contents.)

Volume II (Entries are from March 22 to June 24. Includes drawings of artifacts and a table of contents.)

Burial record (Includes drawings of burials and notes, apparently by Alfred Kidder II.)

List of ceramic artifacts

Financial records

Box 21

Correspondence, 1934–1936

(Includes letters of introduction and lists of equipment. A list of accounts is with the letter to H.W. Dorsey. Correspondents include Franz Blom, Alfred Kidder II, Maurice Kirby, Wilson Popenoe, Donald Scott [Director,

Peabody Museum], Matthew Stirling, and Alfred M. Tozzer.)

1938, Fort Abraham Lincoln, Sheyenne-Cheyenne, and other sites

Field notebooks

Fort Abraham Lincoln (Slant Village) site (Entries are from June 7 to August 1. Includes a photograph of the excavation team, drawings of burials and artifacts, soil profiles, and loose field notes on the Olds, Lower Hidatsa, Amahami, and Aldren sites.)

Fort Lincoln and Sheyenne-Cheyenne sites (Two notebooks of distance measurements, one for the Fort Lincoln and Sheyenne sites and the other for the Sheyenne and Okiedan Butte mound sites.)

Field notes, Sheyenne-Cheyenne site

(Notes on houses 4, 7, 11, 16, 21, 23, and 36.)

Diary (Only three pages of entries, from May 27 to June 6.)

Field notebook and artifact catalogues (The typed lists are taken from the notebook.)

Notes on miscellaneous sites, North Dakota (Notes on Mobridge, Huff Indian Village State Park No. 25, Double Ditch [Burgois], Menoken, Sperry, and White Earth Creek sites.)

Specialist's reports, North Dakota, 1941 (Identification of faunal and vegetal remains found at the sites.)

Drawings of artifacts, Fort Lincoln site

Box 22

Financial records, North Dakota (Includes canceled checks, a notebook of expenses, typed lists of expenses, and correspondence concerning accounts.)

Photograph catalog, North Dakota (Includes lists of photographs for the 1932 Leavenworth and 1939 Arzberger expeditions.)

Includes notes on a trip to São Paulo from August 19 to September 1 for the XXXI International Congress of Americanists.)

Miscellany, n.d. (Includes site drawings from unidentified years and sites [some apparently were not obtained from Strong's expeditions]. The notes on the Mandan are not in Strong's handwriting, but may be from the 1932 Leavenworth expedition.)

Miscellaneous financial records, 1937–1940

MISCELLANEOUS RESEARCH NOTES. 1917–1960, most undated. 1.8 feet.

Included in this series are maps, articles by Strong and other researchers, student papers, correspondence, and photographs. Some of the folders contain information that may have been used for courses Strong taught. Most of the materials seem to have been used as background information for Strong's articles and field work.

Materials in the folders represent, for the most part, the way Strong maintained the papers.

Descriptions in quotation marks are Strong's own.

MANUSCRIPTS OF WRITINGS. 1922–1962 (several undated). 4.2 feet.

Arranged chronologically. Undated materials are placed before dated papers.

The series is composed of Strong's unpublished and published materials, bibliographic notes, typescripts and handwritten drafts of publications, book reviews, correspondence, and notes for lectures and talks.

The materials on Labrador archaeology and the Kwakiutl may have been intended as part of publications, but no other information is available. The manuscript for "Indian Winter in Northern Labrador," edited by Eleanor Leacock and Nan A. Rothschilds, was published under the title *Labrador Winter: The Ethnographic Journals of William Duncan Strong, 1927–1928* (1994). The Signal Butte manuscript is unpublished.

Some of Strong's major publications are either not present or represented only by the illustrations in the article or book. These publications are *An Introduction to Nebraska Archaeology* (1935), *Archeological Investigations in the Bay Islands, Spanish Honduras* (1935), *Preliminary Report on the Smithsonian Institution-Harvard University Archeological Expedition to Northwestern Honduras, 1936* (1938), *Archeological Studies in Peru, 1941–1942* (1943), *Cross Sections of New World Prehistory* (1943), and *The Archeology of Honduras* (1948).

When one of Strong's manuscripts appears in another series, it is so noted in the contents list for that series. Titles in quotation marks are Strong's own.

PAPERS RELATING TO ORGANIZATIONS. 1926-1961. 2.1 feet.

Arranged alphabetically.

Materials in this series include programs, correspondence, minutes of meetings, research proposals, reports, scripts for radio programs, and articles by Strong and other researchers.

The Bureau of Applied Social Research was originally established at Princeton University as the office of Radio Research and transferred to Columbia University in 1940, where the name was changed in 1944. The bureau was originally established to research the role of radio, but at Columbia the purpose expanded its research interests to include all mass media and other aspects of social organization and human behavior. Strong was on the Board of Governors.

Strong served as anthropological consultant to the Bureau of Indian Affairs from May through December 1935.

In April 1939, the Committee on Basic Needs of American Archaeology was appointed in the Division of Anthropology and Psychology of the National Research Council. Strong was appointed chairman, with Clark Wissler, A.V. Kidder, Fay-Cooper Cole, W.C. McKern, J.O. Brew, and W.S. Webb comprising the remainder of the committee. Prior to and during World War II, the committee advised the Work Projects Administration in its archeology projects. During World War II, it assisted the Ethnogeographic Board in halting the looting of Alaskan sites by military personnel. After the war, the committee members became involved in the establishment of standards of professionalism in carrying out archeological excavations. This latter activity led to Strong's proposal to set up the Committee for the Recovery of Archaeological Remains to advise the government in salvaging archaeological information from sites before they were destroyed by public works programs. This new committee began in 1945 with John Otis Brew as chairman. Strong became the National Research Council liaison member of the CRAR in 1946. Out of the committee's work came a program of which the Smithsonian's River Basin Surveys was a major part.

Strong testified for the United States government in Indian Claims Commission cases involving California Indians in 1955 and in *Mission Indians v. United States* in 1960. See the series of correspondence under Indian affairs, Indian land claims, and Justice Department for more information.

The Social Science Research Council was composed of three members each from seven Social Science Associations, including the American Anthropological Association. The purpose of the Council was to promote research in the fields of the social sciences.

TEACHING MATERIALS AND COURSE WORK. 1909, 1928–1961. 4.6 feet.

Arranged by subject.

The papers includes notes made by Strong, materials used by other anthropologists in their classes, and student papers. Strong's class notes from his student days at the University of California at Berkeley are in the series of miscellaneous personal papers. A number of the papers by Columbia University students are biographies or obituaries of anthropologists (see the news clippings under the series of miscellany for more obituaries). Not all the student papers could be firmly assigned to the year of writing.

Concerning the two boxes of lecture notes, the notes under many of these subjects headings may be from more than one class and from more than one year. Apparently Strong borrowed information from other courses and other years for his lectures. The result is that the cards are not necessarily in order by class number, but were maintained in the order in which they were found.

Box 56

Lecture notes

1928-1959

(Includes notes for classes on Primitive religions, Social origins or introductory anthropology, Soc. 46, Soc. 149, Department seminar [1958], General department seminar [1939], Archeology and social science, Seminar 1959 [includes notes taken at the American Indian Ethnohistoric Conference in New York City in 1959], and notes for Anthropology 101, 102, 105, 151, 152, 201, 203, 204, and 351, none of which are identified by name. Also includes Ralph Linton's lecture notes on religion, notes on Comanche, and bibliographic entries.)

Box 57

1937-1961

(Includes notes for classes on Southwest course notes 1938 [Anthropology 119], Seminar 1938, and notes for Anthropology 1, 2, 29, 102, 103, 105, 106, 111, 122, 149, 150, 203, 204, 303, not identified by name. Also includes notes on the Chickasaw, Indian tribes of the Great Plains, Chronologies [time sequences for Alaska, the southwestern United States, the Valley of Mexico, and the Great Plains], and E.T. (Ned) Hall's Mogollon notes.)

MISCELLANY. 1902–1961 (most undated). 5 inches.

Arranged alphabetically.

Materials that did not belong in any of the other series and which were too small to merit a series of their own were placed here. Strong identified the Mohica specimen painting by Ponce as being of great scientific value, but does not give his reasons. It is not known why Strong had the materials relating to the Barrett case. The news clippings and printed matter include articles from both English and Spanish newspapers and magazines.

PHOTOGRAPHS. 1913–1950. 5.3 feet.

Arranged as described below.

The first two boxes of this series are arranged by subject or donor. Included are prints of excavations (some given to Strong by other researchers), photographs of specimens in other museums, and portraits. Of special interest are photographs apparently taken on an Indian reservation in the late 1950s, photographs from the expedition to the town of The Dalles, Oregon from 1924 to 1925, and photographs from the trip to southern California from 1924 to 1925.

The third and fourth boxes are arranged chronologically. The photographs in these boxes are of Strong's field work. Of special interest are prints of Naskapi Indians. Most of these photographs are not duplicated in the succeeding boxes.

The remaining boxes are from Strong's field expeditions and are also arranged chronologically. The prints from these expeditions are mounted in scrapbooks, and most of the prints have a description written on the mount. These scrapbooks contain the most comprehensive prints of Strong's expeditions. In addition to the photographs, there are maps of sites, correspondence, and drawings. There are photograph catalogues in the series on field work.
